DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Lin.

Lin's pipeline filter as illustrated in Fig. 5 includes a subtractor section having a plurality of adder logic units (the differentiators) interleaved with an adder section having a plurality of adder logic units (the integrators). Relative to the details of the differentiators and integrators note Fig. 3(b) and Fig. 3(c) respectively.

3. Claims 1, 5, 6, 10, 11, 13, 14, 17, 21 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Irwin et al (Irwin).

Irwin's pipeline filter as illustrated in Figs. 1 and 3 includes a subtractor section having a plurality of adder logic units (elements 21 and 24) interleaved with an adder section having a plurality of adder logic units (elements 23 and 25). Relative to the delay enable output signal note the T signals of Fig. 3.

4. Claims 23-32 are rejected under 35 U.S.C. 102(e) as being anticipated by Saitoh et al (Saitoh).

Art Unit: 2124

Saitoh's Fig. 1 illustrated both an apparatus and a method of pipeline processing an n-bit word wherein the n-bit word is divided into a plurality of bit segments (W) followed processing the plurality of bit segments (element 2) followed by applying delay enable signals to the processed segments to output same (the application of the mask signals to the multiplexers).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
